## **SPONSORSHIP OPPORTUNITIES**

The ICSNN (International Conference on Superlattices, Nanostructures and Nanodevices) is a biennial conference series with a tradition going back to the 1980s, usually being the largest satellite conference to the International Conference on the Physics of Semiconductors (ICPS). This year the ICPS will be held in Sydney (Australia) the week after ICSNN. The ICSNN will take place in Vietnam, in the city of Quy Nhon in the splendid ICISE.

### **Scope:**

- Quantum Nanotechnologies: Solid state quantum information processing, spin qubits in quantum dots, hybrid superconductor-semiconductor nanostructures
- Two Dimensional Systems: electronic, transport and topological properties, Floquet systems
- Nano-photonics and quantum optics in single quantum dots, microcavities and photonic bandgap materials
- Latest nanostructure fabrication techniques
- Nanoelectronics: transport in semiconductor quantum dots, AC-driven transport, quantum thermoelectricity
- Semiconductor nano-spintronics, spin manipulation in nanostructures
- Terahertz physics and devices
- Nanoelectronics in biosystems, hybrid organic semiconductor systems, molecular systems and devices
- Electronic and optical properties of novel semiconductor structures
